

## Divisional estimates

Districts have been clubbed into divisions to produce divisional estimates on enrollment, reading, and arithmetic levels for children in the 5-16 age group. The grouping of districts is based on administrative divisions used in the state or on geographical regions.

The first row for each division gives the estimate of the relevant variable. The numbers below the estimate, in the second row, are twice the standard error of the corresponding estimate and represent the 95% confidence interval for the estimate. For instance, in Garhwal division of Uttarakhand, in 2024, the proportion of Std III-V children who can read a Std II level text is 51.5%. With 95% probability, the true population proportion lies within 5.32% points of the estimate, i.e., between 46.2% and 56.8%.

### Uttarakhand

#### List of districts under each division

Division/Region	Govt school			Not in school			Learning levels: All schools											
	% Children (aged 6-14) enrolled in govt school			% Children (aged 6-14) not enrolled in school			Std III-V			Std VI-VIII								
							% Children who can read Std II level text			% Children who can do at least subtraction			% Children who can read Std II level text			% Children who can do division
